

AWAIS KHAN

SOC ANALYST INTERN | SIEM • THREAT DETECTION • LOG ANALYSIS • INCIDENT INVESTIGATION

Mumbai, India | +91-8104359272 | awaiskhan69477@gmail.com

LinkedIn | TryHackMe | Blue Team Labs Online | GitHub | Haxcamp

PROFESSIONAL PROFILE

BSc IT student pursuing a cybersecurity-focused career in Security Operations. Hands-on experience building and operating a home SOC lab with Splunk Enterprise and Splunk Universal Forwarder, analyzing Windows security telemetry, writing SPL searches, creating dashboards, and investigating authentication and security events. Practical exposure to Windows Event Logs, Sysmon, Linux logs, PCAP/network traffic analysis, IOC identification, phishing and malware analysis, and blue-team investigation workflows. Comfortable documenting findings, validating alerts, and reasoning through suspicious activity in lab-based SOC scenarios.

EDUCATION

Bachelor of Science in Information Technology (BSc IT)

Pune Vidyarthi Griha's College of Science and Technology, University of Mumbai

Currently pursuing Third Year | Expected Completion: April 2027

Relevant study: Computer Networking, Cybersecurity, Linux Administration, Internet of Things (IoT)

SECURITY SKILLS

SIEM & Security Monitoring

Splunk Enterprise • Splunk Universal Forwarder • SPL • Security Event Monitoring • Log Analysis • Alert Investigation • Dashboard Development • Authentication Event Analysis

Windows Security & Endpoint Telemetry

Windows 10/11 • Windows Event Logs • Event Viewer • Sysmon • Security Logs • Authentication Events • Process Activity • Basic PowerShell

Linux Security & Administration

Ubuntu • Kali Linux • CentOS • File & Directory Management • Process Management • Users & Groups • File Permissions • Linux Log Analysis • Syslog • Bash

Network Security & Traffic Analysis

TCP/IP • OSI Model • DNS • DHCP • HTTP/HTTPS • SSH • FTP • RDP • ICMP • ARP • PCAP Analysis • Network Traffic Investigation

Security Operations & Investigation

Threat Detection • Alert Triage • Incident Investigation • IOC Analysis • Basic Threat Hunting • MITRE ATT&CK • Cyber Kill Chain • Evidence Collection • Investigation Documentation • Phishing Analysis • Malware Analysis

Virtualization & Lab Environment

VMware Workstation • Oracle VirtualBox • Windows/Linux Virtual Labs

Scripting & Automation

Python • Bash • PowerShell

PRACTICAL CYBERSECURITY EXPERIENCE

Home SOC Lab | Splunk Enterprise + Universal Forwarder

- Built a virtualized SOC environment using VMware Workstation with Windows 11, Ubuntu Linux, and Kali Linux.
- Configured Splunk Enterprise on Ubuntu as the central SIEM and Splunk Universal Forwarder on Windows 11 to collect and forward security telemetry.
- Collected and analyzed Windows Event Logs and Sysmon data for security monitoring and investigation.
- Developed SPL searches to investigate authentication activity, failed/successful logins, suspicious events, and basic detection use cases.
- Created dashboards to visualize security events and support continuous monitoring of lab activity.

- Generated controlled brute-force activity and analyzed the resulting authentication events to understand detection, validation, and investigation workflows.

Blue Team Labs Online (BTLO)

- Completed hands-on blue-team investigations involving phishing email analysis, network traffic analysis, malware analysis, and log analysis.
- Analyzed PCAP files and Windows logs to identify suspicious activity and potential indicators of compromise.
- Documented investigation findings, evidence, observations, and security conclusions during practical defensive-security challenges.

TryHackMe

- Completed practical cybersecurity labs covering networking, Windows, Linux, SIEM concepts, and incident investigation.
- Applied security concepts through hands-on exercises involving system analysis, logs, networking, and defensive-security scenarios.

Haxcamp — Cybersecurity Fundamentals & Practical Training

- Studied core cybersecurity fundamentals including networking, security concepts, common attack techniques, defensive security, and basic security analysis.
- Applied learned concepts through practical cybersecurity challenges and hands-on exercises.
- Practiced analyzing security scenarios, identifying suspicious activity, understanding attack techniques, and applying appropriate defensive concepts.
- Developed practical problem-solving skills through scenario-based cybersecurity exercises.
- Strengthened understanding of security fundamentals by connecting theoretical concepts with hands-on investigation and analysis.

TRAINING

Depronix — SOC Analyst / Cybersecurity Self-Study

- Structured self-study focused on SOC Analyst L1 concepts, security monitoring, log analysis, threat detection, incident response, and practical defensive-security workflows.
- Used practical scenarios to strengthen understanding of alert investigation, evidence analysis, triage, and SOC reporting.

Haxcamp — Cybersecurity Self-Study

PROJECTS

PCAP & Network Forensics

Analyzed web-shell, ransomware, phishing, and suspicious network PCAPs using Wireshark/NetworkMiner and documented findings.

SOC Learning Platform

Developed a cybersecurity website for SPL practice, SOC investigations, and security report writing.

Cybersecurity Awareness Program

Developed a college project focused on phishing, scams, fraud, and social-engineering awareness.

CERTIFICATIONS & CERTIFICATES

- Cybrary — Cybersecurity Fundamentals Certificate
- Deloitte — Cyber Job Simulation
- Python Course — Certificate of Completion
- WSCube Tech — Webinar Certificate of Participation

ADDITIONAL PROFESSIONAL EXPERIENCE

Hhcl — Railway Maintenance | 3 Months

- Worked in railway maintenance operations for a three-month period at a night shift.

Note: This role is intentionally presented as general professional experience and not as cybersecurity experience .
